

CHM 221: Organic Chemistry I

This is the first course in a two-semester sequence. Topics in this course include nomenclature, structure, physical and chemical properties, synthesis, and typical reactions for aliphatic compounds with special emphasis on reaction mechanisms and stereochemistry. Laboratory is required and will include common organic chemistry techniques. *+Availability of this course is dependent on upon sufficient demand. See advisor for further information.*

Credits: 4

Lab Hours: 1

Lecture Hours: 3

Prerequisites:

CHM 112

Program: [Chemistry](#)
