

Workforce Solutions

The Workforce Solutions Division, located on the Shoals Campus, works with area companies to meet specific training needs. If traditional classes, whether academic or technical, do not meet the employee development needs of a company, a Workforce Solutions coordinator will work with company representatives to develop training programs, locate a qualified instructor to teach classes, and set the training to the company's schedule. The coordinator will also monitor the class, along with company representatives, to make sure the employees are reaching the company's desired outcomes.

New program offerings include:

- Machinist Apprenticeship Program
- CDL Training Program
- Healthcare Re-Certification Training
