

# ACR 113: Refrigeration Piping Practices

The course introduces students to the proper installation procedures of refrigerant piping and tubing for the heating, ventilation, air conditioning, and refrigeration industry. This course includes various methods of working with and joining tubing. Upon completion, students should comprehend related terminology, be able to fabricate pipe, tubing, and pipe fittings.

**Credits:** 3

**Lab Hours:** 2

**Lecture Hours:** 1

**Program:** Air Conditioning/Refrigeration Technology
