

MAT 103: Medical Assisting Theory II

The structure and function of the digestive, urinary, reproduction, endocrine, and immune systems are presented. Disease processes that are related to these systems will be included. Basic concepts of reproduction, growth and development, and nutrition are taught. Upon completion, students should be able to demonstrate a basic working knowledge of these body systems. BIO 202 may substitute for MAT 103.

Credits: 3

Lab Hours: 0

Lecture Hours: 3

Program: Medical Assisting Technology
