

WMT 214: Basic Hydraulics for Water and Wastewater Technology

This course is designed to provide the student with an understanding of practical hydraulic design related to water supply and wastewater control. Topics include the collection, treatment, and distribution of water and collection and treatment of domestic and industrial wastewater. Upon completion, students should be able to apply principles of hydraulic systems to water and wastewater management practices.

Credits: 3

Lab Hours: 0

Lecture Hours: 3
